The nature of BNPPF's business makes it particularly sensitive to market and macroeconomic conditions in Europe, which have been at times challenging and volatile in recent years.</p> <p>In 2015, the global economic activity remained sluggish. Activity slowed down in emerging countries, while a modest recovery continued in developed countries. The global outlook is still impacted by three major transitions: the diminished economic growth in China, the fall in prices of energy and other commodities, and an initial tightening of the US monetary policy in a context of resilient internal recovery, while the central banks of several major developed countries are continuing to ease their monetary policies. For 2016, the International Monetary Fund (the "IMF") is forecasting the progressive recovery of global economic activity² but with low growth prospects on the medium term in developed and emerging countries.</p> <p>While the exposure of the BNP Paribas Group in emerging countries is limited, the vulnerability of these economies may generate disruptions in the global financial system that could affect the BNP Paribas Group (including BNPPF) and potentially alter its results.</p> <p>In numerous emerging economies, an increase in foreign currency commitments was observed in 2015, while the levels of indebtedness (both in foreign and local currencies) are already high. Moreover, the prospects of a progressive hike in key rates in the United States (first rate increase decided by the Federal Reserve in December 2015), as well as heightened financial volatility linked to the concerns regarding growth in emerging countries, have contributed to the stiffening of external financial conditions, capital outflows, further currency depreciations in numerous emerging countries and an increase in risks for banks. This could lead to the downgrading of sovereign ratings.</p> <p>Given the possible standardisation of risk premiums, there is a risk of global market disruptions (rise in risk premiums, erosion of confidence, decline in growth, postponement or slowdown in the harmonisation of monetary policies, drop in market liquidity, problem with the valuation of assets, shrinking of the credit offering, and chaotic de-leveraging) that would affect all banking institutions.</p> <p>The continuation of a situation with exceptionally low interest rates could promote excessive risk-taking by certain financial players: increase in the maturity of loans and assets held, less stringent loan granting policies, increase</p>

		<p>in leverage financing.</p> <p>Some players (insurance companies, pension funds, asset managers, etc.) entail an increasingly systemic dimension and in the event of market turbulence (linked for instance to a sudden rise in interest rates and/or a sharp price correction) they may decide to unwind large positions in an environment of relatively weak market liquidity.</p> <p>Such liquidity pressure could be exacerbated by the recent increase in the volume of assets under management placed with structures investing in illiquid assets.</p> <p><i>Laws and Regulations Applicable to Financial Institutions.</i></p> <p>Laws and regulations applicable to financial institutions that have an impact on BNPPF have significantly evolved in the wake of the global financial crisis. The measures that have been proposed and/or adopted in recent years include more stringent capital and liquidity requirements (particularly for large global banking groups such as the BNP Paribas Group), taxes on financial transactions, restrictions and taxes on employee compensation, limits on the types of activities that commercial banks can undertake and ring-fencing or even prohibition of certain activities considered as speculative within separate subsidiaries, restrictions on certain types of financial products, increased internal control and reporting requirements, more stringent conduct of business rules, mandatory clearing and reporting of derivative transactions, requirements to mitigate risks in relation to over-the-counter derivative transactions and the creation of new and strengthened regulatory bodies.</p> <p>The measures that were recently adopted, or in some cases proposed and still under discussion, that have or are likely to affect BNPPF, include in particular the EU Directive and Regulation on prudential requirements "CRD IV" dated 26 June 2013 and many of whose provisions have been applicable since 1 January 2014; the proposals of technical regulatory and execution rules relating to the Directive and Regulation CRD IV published by the EBA; the Belgian Banking Law dated 25 April 2014 replacing the previous law of 1993 and introducing important changes; the Belgian Royal Decree dated 22 February 2015 determining the entry into force of the Belgian Banking Law provisions relating to resolution (including the establishment of a Belgian Resolution Authority) and creating two preferential rights on the bank's movables; and the Belgian Royal Decree dated 18 December 2015 amending the law of 25 April 2014 on the status and supervision of credit institutions and the Royal Decree of 26 December 2015 amending the law of 25 April 2014 on the status and supervision of credit institutions relating to the resolution and recovery of group failures, both Royal Decrees being ratified by the Act of 27 June 2016; the public consultation for the reform of the structure of the EU banking sector of 2013 and the European Commission's proposed regulation on structural measures designed to improve the strength of EU credit institutions of 29 January 2014; Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks</p>

Section D – Risks

Element	Title	
D.2	Key risks regarding the Issuer and the Guarantor	<p>Prospective purchasers of the Securities should be experienced with respect to options and options transactions and should understand the risks of transactions involving the Securities. An investment in the Securities presents certain risks that should be taken into account before any investment decision is made. Certain risks may affect the Issuer's ability to fulfil its obligations under the Securities or the Guarantor's ability to perform its obligations under the Guarantee, some of which are beyond its control. In particular, the Issuer and the Guarantor, together with the BNPP Group, are exposed to the risks associated with their activities, as described below:</p> <p>Issuer</p> <p>The following is a summary of some of the additional investment</p>

Element	Title	
		<p>considerations relating to the business of BP2F:</p> <p>(1) <i>Operational Risk</i> - operational risk concerns the risk of loss resulting from inadequate or failed internal processes or systems, human error, external events or changes in the competitive environment that damage the franchise or operating economics of a business.</p> <p>In order to mitigate operational risks, in 2013 BP2F hired two part time employees of BNP Paribas Fortis SA/NV.</p> <p>(2) <i>Legal Risk and Tax Risk</i> – BP2F may face legal risks and tax risks.</p> <p>In case of any potential legal risk, BP2F will request advice from the legal department of BNPPF and external legal advisors, if required by an executive manager of BP2F or by a member of the board of directors.</p> <p>In case of any potential tax risk, BP2F will request advice from the tax specialists of its parent company and advice from external tax advisors if required by a member of the board of directors.</p> <p>(3) <i>Liquidity Risk</i> – liquidity risk concerns the risk that BP2F, though solvent, either does not have sufficient financial resources available to meet its obligations when they fall due, or can secure or sell its assets only at excessive cost.</p> <p>(4) <i>Financial Risk</i> – financial risk encompasses two types of risk:</p> <ul style="list-style-type: none"> • the credit risk - the risk that a borrower or counterparty will no longer be able to repay its debt; and • the market risk – the potential loss resulting from unfavourable market movements, which can arise from trading or holding positions in financial instruments. <p>(5) <i>Settlement Risk</i> – settlement risk is the risk the BP2F takes by being responsible for cash management on a daily basis by monitoring the cash balances of BP2F.</p> <p>BP2F has implemented a payment procedure approved by the board of directors and agreed by BGL BNP Paribas S.A. to mitigate this risk.</p> <p>(a) The primary credit protection for Securities issued by BP2F will derive from the guarantees given by BNPPF.</p> <p>(b) BP2F's ability to perform its obligations in respect of the structured return on structured securities may depend on the ability of its hedging counterparties to meet their obligations under any hedge.</p> <p>(c) BP2F's ability to make payments under the Securities may depend on the operating performance of those companies to which the</p>

		<p>proceeds of the Securities are lent.</p> <p>(d) The financial condition of the operating companies to which the proceeds of the Notes are lent may deteriorate and this may affect BP2F's ability to make payments under the Securities which it issues.</p> <p>(e) During deteriorating or challenging economic conditions BP2F may find it difficult to raise further finance.</p> <p>(f) Transfer pricing tax rules in Luxembourg generate additional costs, which may vary from time to time.</p> <p>Guarantor</p> <p>The following is a summary of some of the investment considerations relating to the business of BNPPF:</p> <p>These main categories of risk are inherent in BNPPF's activities:</p> <p>(1) <i>Credit Risk</i> – Credit risk is the potential that a bank borrower or counterparty will fail to meet its obligations in accordance with agreed terms. The probability of default and the expected recovery on the loan or receivable in the event of default are key components of the credit quality assessment;</p> <p>(2) <i>Counterparty Credit Risk</i> – Counterparty credit risk is the credit risk embedded in payment or transactions between counterparties. Those transactions include bilateral contracts such as over-the-counter (OTC) derivatives contracts which potentially expose BNPPF to the risk of counterparty default, as well as contracts settled through clearing houses. The amount of this risk may vary over time in line with changing market parameters which then impacts the replacement value of the relevant transactions or portfolio;</p> <p>(3) <i>Securitisation</i> – Securitisation means a transaction or scheme, whereby the credit risk associated with an exposure or pool of exposures is tranced, having the following characteristics:</p> <ul style="list-style-type: none"> • payments made in the transaction or scheme are dependent upon the performance of the exposure or pool of exposures; • the subordination of tranches determines the distribution of losses during the life of the risk transfer. <p>Any commitment (including derivatives and liquidity lines) granted to a securitisation operation must be treated as a securitisation exposure. Most of these commitments are held in the prudential banking book;</p> <p>(4) <i>Market Risk</i> – Market risk is the risk of incurring a loss of value due</p>

Element	Title	
		<p>to adverse trends in market prices or parameters, whether directly observable or not.</p> <p>Observable market parameters include, but are not limited to, exchange rates, prices of securities and commodities (whether listed or obtained by reference to a similar asset), prices of derivatives, and other parameters that can be directly inferred from them, such as interest rates, credit spreads, volatilities and implied correlations or other similar parameters.</p> <p>Non-observable factors are those based on working assumptions such as parameters contained in models or based on statistical or economic analyses, non-ascertainable in the market.</p> <p>In fixed income trading books, credit instruments are valued on the basis of bond yields and credit spreads, which represent market parameters in the same way as interest rates or foreign exchange rates. The credit risk arising on the issuer of the debt instrument is therefore a component of market risk known as issuer risk.</p> <p>Liquidity is an important component of market risk. In times of limited or no liquidity, instruments or goods may not be tradable or may not be tradable at their estimated value. This may arise, for example, due to low transaction volumes, legal restrictions or a strong imbalance between demand and supply for certain assets.</p> <p>The market risk related to banking activities encompasses the risk of loss on equity holdings on the one hand, and the interest rate and foreign exchange risks stemming from banking intermediation activities on the other hand;</p> <p>(5) <i>Operational Risk</i> – Operational risk is the risk of incurring a loss due to inadequate or failed internal processes, or due to external events, whether deliberate, accidental or natural occurrences. Management of operational risk is based on an analysis of the "cause – event – effect" chain.</p> <p>Internal processes giving rise to operational risk may involve employees and/or IT systems. External events include, but are not limited to floods, fire, earthquakes and terrorist attacks. Credit or market events such as default or fluctuations in value do not fall within the scope of operational risk.</p> <p>Operational risk encompasses fraud, human resources risks, legal risks, non-compliance risks, tax risks, information system risks, conduct risks (risks related to the provision of inappropriate financial services), risk related to failures in operating processes, including loan procedures or model risks, as well as any potential financial implications resulting from the management of reputation risks;</p>

Element	Title	
		<p>(6) <i>Compliance and Reputation Risk</i> – Compliance risk is the risk of legal, administrative or disciplinary sanctions, of significant financial loss or reputational damage that a bank may suffer as a result of failure to comply with national or European laws and regulations, codes of conduct and standards of good practice applicable to banking and financial activities, or instructions given by an executive body, particularly in application of guidelines issued by a supervisory body.</p> <p>This risk is a sub-category of operational risk. However, as certain implications of compliance risk involve more than a purely financial loss and may actually damage the institution's reputation, BNPPF treats compliance risk separately.</p> <p>Reputation risk is the risk of damaging the trust placed in a corporation by its customers, counterparties, suppliers, employees, shareholders, supervisors and any other stakeholder whose trust is an essential condition for the corporation to carry out its day-to-day operations.</p> <p>Reputation risk is primarily contingent on all the other risks borne by BNPPF;</p> <p>(7) <i>Concentration Risk</i> – Concentration risk and its corollary, diversification effects, are embedded within each risk, especially for credit, market and operational risks using the correlation parameters taken into account by the corresponding risk models.</p> <p>It is assessed at consolidated Group level and at financial conglomerate level;</p> <p>(8) <i>Banking Book Interest Rate Risk</i> – Banking book interest rate risk is the risk of incurring losses as a result of mismatches in interest rates, maturities and nature between assets and liabilities. For banking activities, this risk arises in non-trading portfolios and primarily relates to global interest rate risk;</p> <p>(9) <i>Strategic and Business Risks</i> – Strategic risk is the risk that BNPPF's share price may fall because of its strategic decisions.</p> <p>Business risk is the risk of incurring an operating loss due to a change in the economic environment leading to a decline in revenue coupled with insufficient cost-elasticity.</p> <p>These two types of risk are monitored by the board of directors; and</p> <p>(10) <i>Liquidity Risk</i> – In accordance with regulations, the liquidity risk is defined as the risk that a bank will be unable to honour its commitments or unwind or settle a position due to the situation on the market or idiosyncratic factors, within a given time frame and at</p>

		<p>a reasonable price or cost.</p> <p>(11) <i>Other risks</i></p> <p>(a) Difficult market and economic conditions including, without limitation, concerns regarding the ability of certain countries in the eurozone to refinance their debt obligations, could in the future have a material adverse effect on the operating environment for financial institutions and hence on BNPPF's financial condition, results of operations and cost of risk.</p> <p>(b) Legislative action and regulatory measures taken in response to the global financial crisis may materially impact BNPPF and the financial and economic environment in which it operates.</p> <p>(c) BNPPF's access to and cost of funding could be adversely affected by a further deterioration of the euro zone sovereign debt crisis, worsening economic conditions, a ratings downgrade, increases in credit spreads or other factors.</p> <p>(d) The prolonged low interest rate environment carries inherent systemic risks.</p> <p>(e) The soundness and conduct of other financial institutions and market participants could adversely affect BNPPF.</p> <p>(f) BNPPF may incur significant losses on its trading and investment activities due to market fluctuations and volatility.</p> <p>(g) A substantial increase in new provisions or a shortfall in the level of previously recorded provisions could adversely affect BNPPF's results of operations and financial condition.</p> <p>(h) BNPPF may generate lower revenues from brokerage and other commission and fee-based businesses during market downturns.</p> <p>(i) BNPPF's hedging strategies may not prevent losses.</p> <p>(j) Significant interest rate changes could adversely affect BNPPF's revenues or profitability.</p> <p>(k) Protracted market declines can reduce liquidity in the markets, making it harder to sell assets and possibly leading to material losses.</p> <p>(l) BNPPF is subject to extensive and evolving regulatory regimes in the countries and regions in which it operates.</p> <p>(m) Notwithstanding BNPPF's risk management policies, procedures and methods, it could still be exposed to unidentified or unanticipated risks, which could lead to material losses.</p>

Element	Title	
		<p>(n) While each of BNPPF's businesses manages its operational risks, these risks remain an inherent part of all of BNPPF's businesses.</p> <p>(o) BNPPF has significant counterparty risk exposure and exposure to systemic risks.</p> <p>(p) BNPPF's competitive position could be harmed if its reputation is damaged.</p> <p>(q) An interruption in or a breach of BNPPF's information systems may result in material losses of client or customer information, damage to BNPPF's reputation and lead to financial losses.</p> <p>(r) Litigation or other proceedings or actions may adversely affect BNPPF's business, financial condition and results of operations.</p> <p>(s) Uncertainty linked to fair value accounting and use of estimates.</p> <p>(t) A deterioration of the credit rating of BNP Paribas of its debt quality could adversely affect BNPPF.</p> <p>(u) Unforeseen external events can interrupt BNPPF's operations and cause substantial losses and additional costs.</p> <p>(v) BNPPF may incur substantial fines and other administrative and criminal penalties for non-compliance with applicable laws and regulations, and may also incur losses in related (or unrelated) litigation with private parties.</p> <p>(w) Intense competition in the financial services industry could adversely affect BNPPF revenues and profitability.</p> <p>(x) Adjustments to the carrying value of BNPPF's securities and derivatives portfolios and BNPPF's own debt could have an impact on its net income and shareholders' equity.</p> <p>(y) The expected changes in accounting principles relating to financial instruments may have an impact on BNPPF's balance sheet and regulatory capital ratios and result in additional costs.</p> <p>(z) Risks related to the implementation of BNPP Group's strategic plans.</p>
D.3	Key risk regarding the Securities	<p>In addition to the risks (including the risk of default) that may affect the Issuer's ability to fulfil its obligations under the Securities or the Guarantor's ability to perform its obligations under the Guarantee, there are certain factors which are material for the purposes of assessing the market risks associated with Securities issued under the Base Prospectus, including:</p> <p><i>Market Risks</i></p>

Element	Title	
		<p>Securities are unsecured obligations;</p> <p>Securities including leverage involve a higher level of risk and whenever there are losses on such Securities those losses may be higher than those of a similar security which is not leveraged;</p> <p>The trading price of the Securities is affected by a number of factors including, but not limited to, (in respect of Securities linked to an Underlying Reference) the price of the relevant Underlying Reference(s), time to redemption and volatility and such factors mean that the trading price of the Securities may be below the Final Redemption Amount or value of the Entitlement;</p> <p>Exposure to the Underlying Reference in many cases will be achieved by the relevant Issuer entering into hedging arrangements and, in respect of Securities linked to an Underlying Reference, potential investors are exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Securities;</p> <p>The collateral associated with one or more series of Secured Securities may be insufficient to fully mitigate a Holder's credit risk on the Issuer;</p> <p>Holders will be exposed to the credit risk on, among others, the Swap Counterparty and the issuer of the relevant Reference Collateral Assets and potential investors are exposed to the performance of these entities and associated hedging arrangements and events that may affect these entities and associated hedging arrangements and consequently the occurrence of any of these events may affect the value of the Securities;</p> <p>There are specific risks in relation to Securities linked to an Underlying Reference from an emerging or developing market (including, without limitation, risks associated with political and economic uncertainty, adverse governmental policies, restrictions on foreign investment and currency convertibility, currency exchange rate fluctuations, possible lower levels of disclosure and regulation and uncertainties as to status, interpretation and applicable of laws, increased custodian costs and administrative difficulties and higher probability of the occurrence of a disruption or adjustment event). Securities traded in emerging or developing countries tend to be less liquid and the prices of such securities more volatile. There are also specific risks in relation to dynamic securities which are intrinsically more complex making their evaluation difficult in terms of risk at the time of the purchase as well as thereafter;</p> <p><i>Holder Risks</i></p> <p>The Securities may have a minimum trading amount and if, following the transfer of any Securities, a Holder holds fewer Securities than the specified minimum trading amount, such Holder will not be permitted to transfer their</p>

		<p>remaining Securities prior to redemption without first purchasing enough additional Securities in order to hold the minimum trading amount;</p> <p>The meetings of Holders provisions permit defined majorities to bind all Holders;</p> <p>In certain circumstances Holders may lose the entire value of their investment;</p> <p><i>Issuer/Guarantor Risks</i></p> <p>A reduction in the rating, if any, accorded to outstanding debt securities of the Issuer or Guarantor by a credit rating agency could result in a reduction in the trading value of the Securities;</p> <p>Certain conflicts of interest may arise (see Element E.4 below);</p> <p>In certain circumstances (including, without limitation, as a result of restrictions on currency convertibility and/or transfer restrictions), it may not be possible for the Issuer to make payments in respect of the Securities in the Settlement Currency specified in the applicable Final Terms. In these circumstances, the payment of principal and/or interest may occur at a different time and/or made in USD and the market price of such Securities may be volatile;</p> <p><i>Legal Risks</i></p> <p>The occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities, early redemption or may result in the amount payable on scheduled redemption being different from the amount expected to be paid at scheduled redemption and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities;</p> <p>In certain circumstances settlement may be postponed or payments made in USD if the Settlement Currency specified in the applicable Final Terms is not freely transferable, convertible or deliverable;</p> <p>Expenses and taxation may be payable in respect of the Securities;</p> <p>The Securities may be redeemed in the case of illegality or impracticability and such redemption may result in an investor not realising a return on an investment in the Securities;</p> <p>Any judicial decision or change to an administrative practice or change to English law or French law, as applicable, after the date of the Base Prospectus could materially adversely impact the value of any Securities affected by it</p> <p><i>Secondary Market Risks</i></p> <p>The only means through which a Holder can realise value from the Security</p>

Element	Title	
		<p>prior to its Maturity Date, is to sell it at its then market price in an available secondary market and that there may be no secondary market for the Securities (which could mean that an investor has to wait until redemption of the Securities to realise a greater value than its trading value);</p> <p>An active secondary market may never be established or may be illiquid and this may adversely affect the value at which an investor may sell its Securities (investors may suffer a partial or total loss of the amount of their investment);</p> <p>For certain issues of Securities, BNP Paribas Arbitrage S.N.C. is required to act as market-maker. In those circumstances, BNP Paribas Arbitrage S.N.C. will endeavour to maintain a secondary market throughout the life of the Securities, subject to normal market conditions and will submit bid and offer prices to the market. The spread between bid and offer prices may change during the life of the Securities. However, during certain periods, it may be difficult, impractical or impossible for BNP Paribas Arbitrage S.N.C. to quote bid and offer prices, and during such periods, it may be difficult, impracticable or impossible to buy or sell these Securities. This may, for example, be due to adverse market conditions, volatile prices or large price fluctuations, a large marketplace being closed or restricted or experiencing technical problems such as an IT system failure or network disruption;</p> <p><i>Risk Relating to Underlying Reference Asset(s)</i></p> <p>In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include:</p> <p>Exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities</p> <p><i>Risks relating to specific types of products</i></p> <p>The following risks are associated with SPS Products</p> <p>Vanilla Products</p> <p>Investors may be exposed to a partial or total loss of their investment.
